Boys in Kilts - Part 8 - The Doctor Calls

I woke early and for a few seconds I hadn't a clue where I was. Sunshine was streaming in through the window and it created a magical golden glow on the timber walls of the cabin.

I rose and quickly showered, ignoring my hard cock apart from a good soaping, which almost went further then went through to the boys to get them moving. Most of them were still dozing or just lying under the sheets with dreamy looking expressions and hands out of sight under the covers. I wonder what they were doing mmm!

Paul's bed was empty and I panicked, headed for the main shower room and toilets after asking the boys to look sharp as breakfast was in 30 minutes. A lot of groaning followed me as I left the room.

I found Paul having a shower and I spoke to him asking if he was OK, he smiled at me and said he was great and had put the clean nappy and plastic pants in a bag and pointed to them in his open locker. I told him that it was fantastic that he had had a clean night and hopefully he was on the way to being dry every night. I removed the bag and took it to my room where it would be safe and out of sight ready for the next night.

After breakfast, Mike read out the running order for the Doctor, who had just arrived and then passed me the list to manage the procedure for my group. As he was doing so he asked if I had enjoyed my nocturnal visit from Jakob, I smiled and blushed slightly which spoke volumes! Mike slapped me on the back, smiled and headed off to organise the first activities for the day, which included swimming in the pool.

The Doc approached me and introduced himself as Steve Corrigan a 28 year old Doctor who was specialising in preteen and adolescent health and was working on a research project on boys' sexual development from pre-puberty through to full maturity. He was 6' tall, with a slim build and beautiful pale blue eyes. He had blond hair cut in a buzz cut and cute smile. He was hot and I guessed that the boys would love him too.

I had asked the first 6 boys from my group to stay behind after breakfast and they were all patiently waiting. I called everyone to follow the Doc and I through to the medical suite, which was a fully equipped modern facility that wouldn't have looked out of place in a hospital emergency room.

There was a small waiting area, toilets and an un/dressing area just off the main room where the Doc was settling in. He asked me to get the boys

stripped off to underwear and I told him about the 'traditional' rule for the kilts and he laughed saying that would make things much easier.

The first boy up was Jamie, Mike's 14-year-old son who walked into the examination room naked, smiling and confident. Jamie is very slim and has spiked short blond hair with blue/grey eyes. Doc introduced himself and asked Jamie to sit up on the exam table.

Doc ran the usual tests, BP, reflexes, chest, ears, mouth, height and weight etc and then asked Jamie to stand up so that he could move onto the boy's genitals. The Doc carried out a detailed examination of the boys cock, including a measurement of its length soft, and its girth. He recorded the data on a clip-board then took Jamie's still soft cock in his hands and examined the cock head, slit and the main body of his cock. Now, as a spectator I was getting hard and secretly wished that I had stuck in at school and become a boy doctor - what an amazing job. My cock was fully hard as the Doc continued onto Jamie's balls and his 2" uncut soft cock was now well on the way to being very hard indeed, his foreskin pulling back to uncover the beautiful gleaming boy cockhead. His light brown pubes were sparse and his smooth balls hung low. You could almost hear time passing as I watched the Doc continue down, under Jamie's hard cock to his balls, checking each one gently for any signs of irregularity and in doing so, asked Jamie to hold his solid boy cock out of the way of his examining fingers, to cough a couple of times to enable him to complete his checks.

Jamie's face was a picture while the Doc continued his exam by asking Jamie to climb up on the exam table as close to the end of it as possible. He then got him to raise his legs, bend them at the knees, then helped him to locate his feet in the stirrups that were attached to the table, the sort more usually used for female gynaecological exams. The boy complied and moved onto the table, moving his feet into the stirrups which forced his young legs wide apart, giving both the Doc and I a fantastic view of Jamie's rosebud. What a beautiful sight, it was smooth and clean with the small pink hole centred in the puckered skin, what an amazingly beautiful ass he had.

The Doc explained what he had to do to Jamie who gave his approval. The Doc sat on a wheeled stool, which he rolled in between Jamie's wide-open legs right in front of his ass. The KY tube was opened and the thick lubricant was slowly squeezed gently onto the Doc's finger and I noted that he was not wearing gloves. He also applied some of the cold, clear, thick lube to Jamie's ass hole and gently worked it in with his finger. What a job!!!

Jamie was now moaning with the pleasure that the Doc was giving him and he tried to move further down the table towards the invading finger to get it deeper into his ass hole. The Doc obliged, and pushed his lubed finger into the boy's ass. He moved it around inside the boy and the moans of pleasure were loud, as Jamie experienced a very special rectal examination.

I could see that Jamie's boy cock was solid and dripping pre-cum onto his belly. He unconsciously tried to spread his legs in an attempt to get the Doc's finger even deeper into his bottom, but with the stirrups he was in a fixed position of ecstasy.

The Doc removed his finger, to an audible moan of displeasure from Jamie, as his small ass hole was left gaping slightly open to the air after the loss of the Doc's digit.

Doc moved up to the side of the table taking his measuring rule and quickly took stock of the boy's fully erect cock, which was a glorious 4" of hard boy-cock. He again recorded the information on the clipboard. The boy's cock was leaking loads of pre-cum onto his belly.

Finally, the Doc said he needed a sample of Jamie's cum to check that it was OK and Jamie was in such a state of arousal that I knew it wouldn't take long to achieve. The Doc asked Jamie how he would like to do this and Jamie looked at me and pointed, saying that he wanted me to bring him to orgasm. The Doc nodded agreement and motioned me forward to start the process which all of us knew would be short lived. The Doc also advised me that unfortunately I would not be able to eat all of Jamie's cum, as he needed some of it for his records, so I decided that I would bring the boy off by hand. I moved forward and took Jamie's straining boy-cock into my right hand and started to gently slide his skin up and down - he moaned with pleasure and said that he wanted my fingers in his ass, so I moved my left hand down under his balls and slid one finger deep into the well lubed, warm ass hole. It slipped in easily and touched his sweet spot almost immediately. As I increased the speed of my wanking the boy was squirming around on the table, his hands thrashing at his sides and his head moving side to side on the pillow. I finger-fucked his ass and wanked his boy cock steadily.

As I added a second finger to his ass Jamie squealed with delight and at the same moment erupted, the Doc was there and caught the first shots of his cum in a small plastic cup then stood back and let me dive in for the rest. My fingers were deep in his ass hole, massaging his prostate and sucking his boy cock hard of its last spurts of creamy load, which I swallowed down savouring each drop.

Nothing happened for what seemed like ages, none of us moving, Jamie appeared to be unconscious as his cock softened and the foreskin slowly crept back over his red glans, he laid there out of it. It was as though time had been suspended with only the quiet tick of the wall clock and the smell of raw boy sex in the brightly sunlit room.

The Doc then stepped forward breaking the dream-like state we were all in and touched Jamie's forehead gently, telling him that he had been a great patient. Jamie dreamily opened his eyes and a huge smile spread over his face saying that he wanted Steve to be his Doc forever more as long as I was his assistant!! The Doc laughed and said he would see what he could do!

Next up was Paul and the Doc went through the same procedure as with Jamie. Again I was asked to assist with the sample load of cum for research purposes, which I did much to Paul's delight. Paul checked in at 2" soft and his uncut cock reached 3.5" fully hard.

The Doc then discussed with Paul the bed-wetting issue asking him if he had ever been to a doctor about it in the past, and Paul said that he hadn't as his parents fully expected him to just stop doing it eventually when he stopped being 'silly'.

Like me the Doc was upset at the attitude that Paul's parents had displayed and was full of praise for the little I had done to help the boy. The Doc took some blood and urine samples for analysis and told Paul that there was a chance that he may have an infection in his urinary tract that could be the cause of his problem. These infections could be very deep-seated and difficult to remove, but with the targeted use of antibiotics it would clear the infection up in no time. Paul was ecstatic and crying, as no one had taken the issue seriously until now.

Doc said that he would have the test results back in a few days and would come back to the camp as soon as he had them for a further consultation with Paul. The boy left the med. room with a huge smile on his face and looked happier than he had in days. I hoped that the Doc could really fix the problem and set Paul free from the curse he was living through.

Next boy up was 16-year-old Adrian, a beautiful slim tall boy with gorgeous straight black shining hair and deep hazel brown eyes. His long lashes would make any girl hate him. He had a clean smooth skin tone and full lips - wow! What a boy. I had watched him being royally fucked by Martin the previous day so was interested to see if the Doc would spot this when he examined his ass hole.

His cock was also uncut and 3" flaccid. It was a slim cock with an even thickness all the way down to his black pubic bush. His balls were hairless but fully developed and hung down low.

The Doc asked Adrian to get up on the table and guided him into the stirrups. Once in position Doc wheeled his roller stool in between the boy's wide-open legs and came face to face with his smooth rosebud. The Doc examined his ass with great care then asked Adrian if he had had anal sex recently. I knew he probably would, and poor Adrian looked as though he had been caught with his hands in his Mum's purse! He was bright red and trying desperately to come up with an excuse that would be acceptable. The Doc stopped him in mid-mumble and said that it was not his place to judge but it was an observation and that was all. Adrian looked relieved and stopped babbling. Doc asked if he felt any pain or discomfort when he was being fucked and Adrian said that he was OK except initially when he was being penetrated, that it was painful. Doc nodded and said that perhaps I could give him some basic instruction on the best method of preparing an ass for fucking and I readily added it to my to-do list, which was getting as long as my cock was right now.

Doc asked him if his ass was still tender from the previous day's fucking and the boy smiled and said that it was just fine, as he was a dedicated 'bottom' and needed as much practice as he could get. Adrian's exam continued same as the others and this time the Doc did the sample delivery and I was delegated to catching some of the valuable load in a plastic cup. Doc also asked me to take a measurement of the boy's now fully erected uncut slim cock, which I did with pleasure, making sure I handled the young cock as much as possible when doing so. It came in at a full 5.5" with the skin fully retracted and a fiery red, gleaming cock head in full view.

Doc started his milking and very soon Adrian was moaning loudly as the Doc's right hand did the business on his cock, his fingers buried deep in the boy's swollen ass. Doc got two fingers in hitting Adrian's prostate, the boy yelped and came in the same second, almost catching me out and although I missed the first shot which went over the boy's head, I got the second leaving the Doc to clean up the remaining spurts and dribbles, as Adrian lay there in the afterglow of his orgasm.

Being a Doc's assistant was hard work but very rewarding! We took a break for coffee and told the remaining boys to get a soft drink in the dining hall too.

Back in the medical room the Doc called his next patient, 12 year old Jake. Jake was a slim skinny boy with mousy brown hair and brown eyes and he came into the room naked as the day he was born, his flaccid cock bouncing as he walked. Doc carried out the medical swiftly and measured Jake's small boy cock at 2" when soft and as he got him up onto the table into the stirrups, he was able to get the hard dimension, which came in at just a tad over 3". Jake was uncut and his skin pulled back easily over his red glans his juicy boycock bouncing in time with his heartbeat. His pubes were very sparse and just covered an area above his cock with his juvenile balls smooth as an egg.

Unfortunately, no sample could be taken from the boy as he was still dry but he still had to have the anal exam, so he didn't miss out too much. Doc pulled up his roller stool between the boy's wide-open legs, his small, smooth, pink hole waiting for the Doc's attention. The KY tube was opened and squeezed onto Doc's waiting finger and he then spread a good amount over the boy's warm asshole. The sunshine was filling the room with bright light so I could clearly see the detail of every action that Doc was taking. He smeared the thick, gooey, viscous gel around and into the entrance to Jake's ass. The boy groaned with pleasure as the Doc's finger pushed against his sphincter muscles and on into his warm insides. I moaned quietly with the pleasure it was giving me. The boy's hard cock was bouncing against his belly fast, as his heartbeat quickened in line with the excitement he was feeling. Doc's finger was almost all the way into the boy and then he slid it almost completely out. He moved his digit around the inside of the boy's asshole as he checked his prostate. Doc then started to finger-fuck the boy, his pace quickening and he then took the baby boy's cocklet in his other hand and started to wank him gently. The boy thrashed about on the exam table, so much that I thought he was going to fall off. I moved to his side and massaged his small chest with my hand and tweaked his button nipples as he approached orgasm. He literally yelled as he came and Doc's finger rammed home hitting his sweet spot as the boy dry climaxed.

It was so erotic. The boy looked to be unconscious on the table as his small erection subsided and his long foreskin started to slowly cover the ruby red head of his cock. Again, it was as though time had stopped and the room was bathed in the aroma of boy sex and sweat.

Jake came around and looked dreamily at the Doc and thanked him for such a pleasurable experience. The Doc smiled saying that it was his pleasure.

Jake then said that he had a question and the Doc said to go ahead. He asked when he would be able to shoot real cum, as he was frustrated that he was still dry. The Doc said that it was impossible to predict, but that it could happen anytime soon, as Jake was 12 and at the beginning of his development as his cock size confirmed. He was sorry not to be more specific but just said that one day or night Jake would cum for the first time, and he would never be dry again. Jake thanked the Doc and said he had a further question. The Doc laughed and said go ahead, it's cool. Jake wanted to know about anal sex and wondered if there was anything he could do to make it easier as he had heard that it was painful. Doc said that there would be some instruction soon about it and that I had some toys, which included those that could be used to train an ass to accept a cock more easily. Jake said he couldn't wait! Nor could I!!

Next up was Andrew who was quite tall for his 15 years. He was very skinny and looked as though a good meal would do him no harm. Mike had mentioned that his mum was worried that no matter what she fed him, he was always hungry. The Doc decided to do some detailed tests to see if there was any real cause for concern. Andrew loves swimming and has broad shoulders, which taper down to a very trim waist. He has long straight wispy blond hair and the most intense vivid blue eyes, which are crystal clear, and when they focus on your eyes, you melt. Doc explained the additional tests to Andrew, as he stood nervously naked, in front of the Doc's desk. He carried out the full medical exam and measured Andrew's cut flaccid cock at 4". Now I am not a lover of cut cocks but this one had been cut expertly with a very fine scar line below the naked head of his cock. It was a slim cock with an even width along its whole length and currently lying soft over his low hanging adult sized balls.

Andrew was very nervous and I thought that it may be difficult for the Doc to get a hard measurement, or a sample from him. We progressed to the table and Andrew was soon in position in the stirrups with his cute ass hole in full

view. Still no hard-on though, his cock remained soft laying on his pubes. Doc rolled in again on his stool for the anal exam, once again the KY was deployed onto his finger then onto and into Andrew's ass. The boy visibly jumped when the cold wet finger brushed against his rosebud as the Doc spread the viscous liquid around his sphincter. As Doc went slightly deeper, Andrew jumped the Doc asking if he was OK and the boy said yes, just a bit uncomfortable. Doc said he wouldn't be long as he moved his finger around inside the boy's hot rectum.

Andrew's cock started a rapid change when the Doc hit his prostate massaging it gently. His cock very quickly started to move, swell and lengthen as the Doc did his magic. Andrew gasped and writhed on the bed as a raft of pleasurable feelings swept through his young body. Soon his cock was at its full size and Doc again asked me to do the honours and measure it, recording the data as before. I asked Andrew if he was cool with me doing it, he smiled and nodded OK. I took his hard, wet member in my hand and spread some of his pre-juice over his cockhead before measuring it. It was a very respectable 6.5", such a hot cock I could have just gone down on it there and then.

Doc explained to Andrew that we needed a sample of his sperm and asked him if he wanted assistance from anyone, or did he wish to deliver on his own. The boy decided that he would do it himself and Doc nodded agreement. Andrew licked his right hand and immediately applied it to his already wet cock head before starting to jack himself off. It's amazing how each male knows the best technique for wanking his own cock, although it is good to have someone else's hand or mouth on your cock, your own hand knows your cock best. His speed was increasing; eyes closed, breathing deeply as he worked his hard boy cock. Doc was still massaging the sweet spot in the boy's ass and he asked me to be ready with the collecting cup for a sample, which he knew would be any second. I took up my position beside the exam table and watched the boy wank himself hard, Doc's finger fucking his ass, then it happened. The first shot was awesome, it was thick creamy and went right past the waiting cup and hit Andrew on the face. I managed to catch the second then most of the third, all very thick white creamy boy cum before his cock started to dribble the last few spurts onto his heaving belly. The Doc removed his finger slowly and gently from Andrew's ass as he lay there gasping, face flushed and covered with his cum, still holding his wilting cock.

He smiled and said that it was the most amazing orgasm he had ever had and thanked the Doc for his help. Doc smiled and said that it was all part of the service!!

The last thing Doc had to do was gather some blood from Andrew for the other tests he wanted to run and he told the boy that he would bring the results back with him later in the week. He would make an appointment to see him again then. Andrew smiled and said he would be waiting!

The last boy was Martin who was the most physically developed of all my group. He worked out at the gym regularly and had decided that he wanted to develop his body as far as he could, and was working on it hard. He also enjoyed track sports and already his pecs and abs were showing definition and he was already a very desirable boy. He had unruly mousy brown hair that lightened in the summer sunshine to a darkish blond, and his beautiful sexy brown eyes sparkled with mischief and promise.

He stood proudly naked in front of the Doc as he went through the checks of the medical, methodically. He recorded Martin's cut soft cock at 3.5" and I noted that his circumcision had not been as neat as Andrew's as there was quite a significant scarring under the head where the cut had been.

Doc motioned Martin up onto the table and guided him into the stirrups. Wheeling into place, the Doc explained what he was going to do and loaded up with KY pushing his finger slowly into the boy's slightly hairy asshole. Martin was clearly enjoying this attention as his cock jumped to attention immediately and very soon was at full hardness. I asked the boy if I could measure it and he nodded agreement. It came in at a full 6". His cock tapered from the head to the base becoming really quite thick at his pubes as I thought back to the fucking that he had given Adrian the day before and how Adrian had taken it easily, even though it was a very thick tool.

Doc then explained that he wanted a sample from the boy. Martin grinned and said that was fine by him. He then made a surprise request. He wanted me to fuck him while the Doc wanked his cock to get the spunk. I looked at the Doc questioningly and he nodded agreement.

I dropped my kilt, my already hard cock ready for action and very wet from the morning's workload. I swapped places with the Doc stepping up to Martin's open ass. It had been very well lubed by the Doc, so I moved forward rubbing the hard head of my cock over his ass hole. I then placed my cockhead at his sphincter pushing gently, opening his hole as I went. The Doc took his place alongside the table taking Martin's solid cock in his hand, and very slowly started to wank his cock. He used some KY to assist his wanking heightening the pleasure that we were giving the boy.

I pushed further and felt his tight sphincter muscles gripping my cock hard, as I suddenly was inside him. He yelped, and I stopped, asking him if I should continue and he said that if I stopped now he would never speak to me again! I pushed deeper, as Doc increased the speed of wanking the boy's beautiful hard cock. I went for it and my pubes were suddenly up against the boy's balls, which were bouncing against me as he was wanked by the medic.

I pulled back slowly until my cockhead met the inside of his sphincter and I almost pulled out. I hesitated momentarily before sliding back deep inside his ass. I gathered speed, in and out fucking his ass hard, the boy yelling at me to fuck his ass as the Doc wanked his boy cock. I noticed that the Doc had taken his hard cock out of his sweatpants and was wanking it furiously alongside the boy and I was matching it with harder and harder thrusts into the boy's insides.

There was an almost tangible air of orgy in that room. The sunshine filled the room with a warm glow, matched by the heat of the three bodies having sex, linked physically in lust and the smell of sex in the room was almost able to be touched.

I started to cum from deep inside my belly, I felt it start and build as it does when it is a slow burning orgasm of great intensity. I growled that I was on the way, Martin gasped that he too was coming and the Doc just wanked him faster and thrashed his own cock. We all three came together, me deep inside the boys asshole, Martin all over his face, chest and body as well as the Docs hand and the Doc shot rope after creamy rope of cum all over the floor below the exam table.

I collapsed forward into Martin and kissed him hard, our tongues meeting in a deep embrace, my softening cock still buried deep in his hot, wet spunk filled boy bottom. I pulled back and thanked him and he smiled and thanked me back. The Doc stood up, his softening cock still dripping cum into the pools already gathering on the floor.

Only problem was that we had not managed to collect a sample of Martin's cum for the Doc's research and we laughed about that. Doc gave Martin a plastic container and asked him to supply a sample as soon as possible and get the

local lad Chas, who worked in the kitchen, to drop it into his surgery the next day.

Our group meds were over and it was time for lunch so the Doc and I made for the dining hall where everyone else was already at the tables enjoying lunch. I had had a very rewarding morning with the Doc and I was looking forward to teaching the boys about the sex toys that Mike had supplied, later in the afternoon.

Only problem was I was wondering if I was going to have the stamina to last two weeks at this rate! I would certainly be giving it my best shot.

Part 9 coming soon, thanks to everyone who has written with encouraging comments and erotic suggestions, keep them coming. I appreciate it a lot.
